

easy  WMS

## YARD MANAGEMENT SYSTEM (YMS)

**Eliminate bottlenecks at the docks**

This advanced Easy WMS functionality **supervises movements of vehicles in the yards** of warehouses and distribution centres. The software provides logistics managers with real-time visibility of incoming and outgoing vehicles. It also displays KPIs and generates reports and audits to improve punctuality rates and warehouse efficiency.

Yard Management System (YMS) **syncs operations at the loading docks**, enabling efficient planning of goods receipt and dispatch. It monitors traffic in the yard, at the docks, and in the parking zones at all times, enabling fast reassignment of vehicles to docks if necessary.

### BENEFITS OF YARD MANAGEMENT SYSTEM (YMS)

**Optimised use** of yards and loading docks

**Safety and control** at warehouse access points

**Streamlined wait times** in goods receipt and dispatch

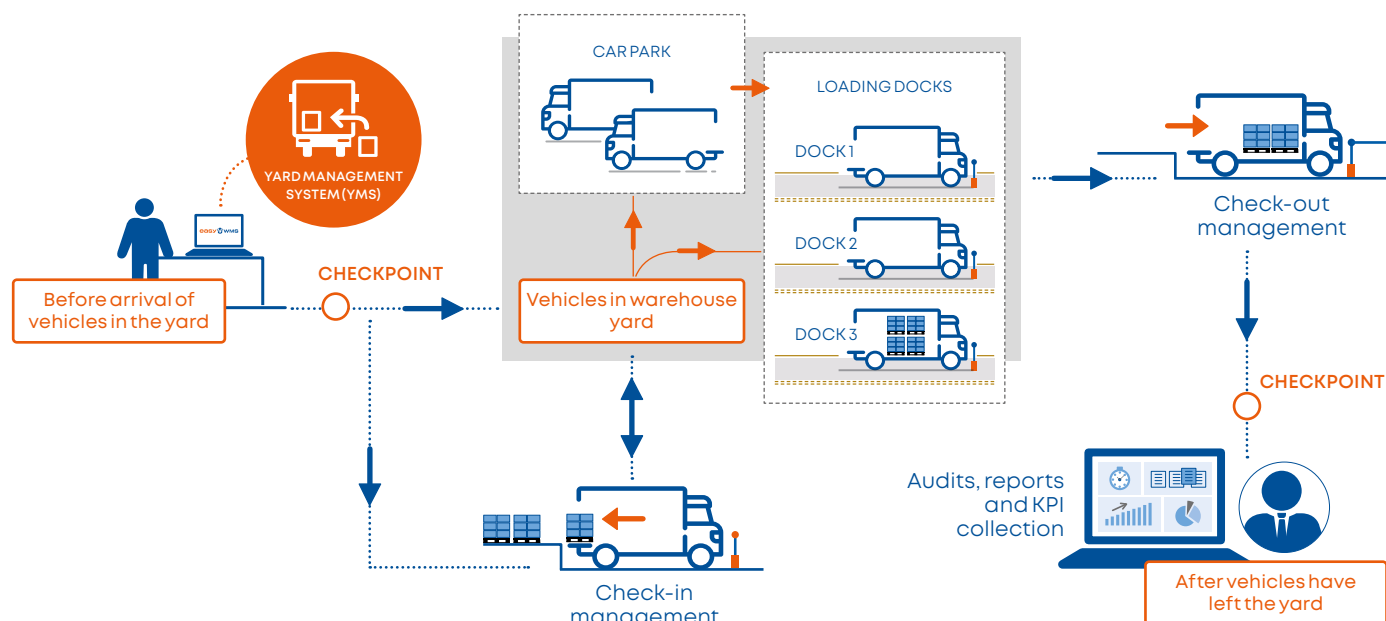

**Quick assignment or reassignment** of vehicles to docks

**Smooth communication** with customers, suppliers and carriers

**Fewer errors** and unnecessary movements

Yard Management System (YMS) ensures control over the management of warehouse yards

## OPTIMISE YARD MANAGEMENT AT YOUR WAREHOUSE

### Functions of Yard Management System (YMS)

- Planning and management of appointments for goods delivery and/or pick-up
- Coordination of stock check-in and check-out
- Supervision of the use of loading and unloading areas, parking zones and access points
- Notification to drivers of data such as available docks, departures from docks, etc.
- Audits, reports and KPI collection

### Synchronisation of movements in the warehouse yard

To enhance logistics service in warehouse yards, Yard Management System (YMS) **enables seamless communication between clients, logistics providers and drivers**. It automatically notifies drivers of the most relevant data, i.e., available docks and contact information.

The Easy WMS module **validates the check-in of all vehicles that access the yard**. After identifying them, it automatically assigns each vehicle a dock or parking space. In this stage, the module is responsible for managing all vehicles in the yard and supervising the status of the docks and of each parking space.

YMS also **optimises vehicle exits**: it checks departure times to carry out audits, identifies goods and drivers, and generates and prints the necessary documentation.

### Why choose Mecalux Software Solutions?

The company has **60+ years** of experience in warehousing solutions and a presence in over 70 countries.

More than **500 engineers** are exclusively dedicated to the development of logistics and supply chain software.

More than **1,200 facilities** in 36 countries are managed by Mecalux software solutions.

Software is **continuously developed** and updated, thanks to major investments in R&D.

**Technical support** is available in multiple languages 24 hours, 365 days a year.
